

## Rules

Your carpool or vanpool will operate smoothly when a few rules are established in advance. For example, decide on policies about smoking, the radio, waiting times, and driving rotation. Agree on vacation plans and illness notification. A few minutes spent in setting some basic rules now will save time and headaches later.

## Records

You may want to keep specific records. A list which includes each carpool/vanpool participant's name, address, home phone, and work phone comes in handy in case of emergencies. A record of mileage, gasoline purchases, and fares eliminates conflicts at a later date.
